DETAILED ACTION

Receipt is acknowledged of Applicant's Amendment filed on 06/12/2006. Claims 4 and 13 have been cancelled and claim 1 and 10 have been amended. Claims 1-3, 5-12, and 14-17 are pending in the instant application.

Double Patenting

Claims 1-3, 5-12 and 14-17 provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over copending Application No. 10/264,886 and 10/891,895 **are maintained** for reasons of record filed on 02/10/2006 in the previous office action.

Claim Rejections - 35 USC § 102

Applicant's arguments with respect to linoleic acid versus conjugated linoleic acid have been fully considered and are persuasive. The §102 rejection has been **withdrawn**.

Claim Rejections - 35 USC § 103

Claims 1-3, 5-12 and 14-17 rejected under 35 U.S.C. 103(a) as being unpatentable over HAND et al in view of CUNNINGHAM **are maintained** for reasons of record filed on 02/10/2006.

Response to Arguments

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). In this case, Applicant argues that HAND teaches a product that is used for the reduction in plaque and teeth cleaning, not to promote weight management. The Examiner finds this argument unpersuasive, because HAND disclosed the typical pet food nutritional content for protein, carbohydrate, fat, and fiber, which are within Applicant's ranges in claim 1. CUNNINGHAM disclosed diacylglyceride from Econa oil lowers body fat. It would have been obvious to add diacylglyceride (DAG) into a typical pet food to decrease body fat.

Applicant argues that there is no motivation to combine. The Examiner finds this argument unpersuasive, because obesity poses a life-threatening problem to domesticated animals, such as mice, dogs, cats, and pigs.

Applicant argues that DAG has promising results in lowering fat in humans, but there is no mention or suggestion that DAG would work in domesticated animals. The Examiner finds this argument unpersuasive, because the person of ordinary skill in the art knows that animal studies are required before human studies can be conducted. Thus, it is obvious that the DAG must have showed promising results in animals.

Citation of Pertinent Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. PARK, et al (*Evidence that the trans-10, cis-12 isomer of conjugated linoleic acid induces body composition changes in mice*. Lipids. (1999) Vol. 34, No.3, pages 235-241) disclosed dietary conjugated linoleic acid has been shown to affect body composition, such as reduction in body fat and enhancement of fat-free mass, in mice, rats, and pigs.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
